

1. Paste the input images (hut.jpg and mountain.jpg) in the required folder

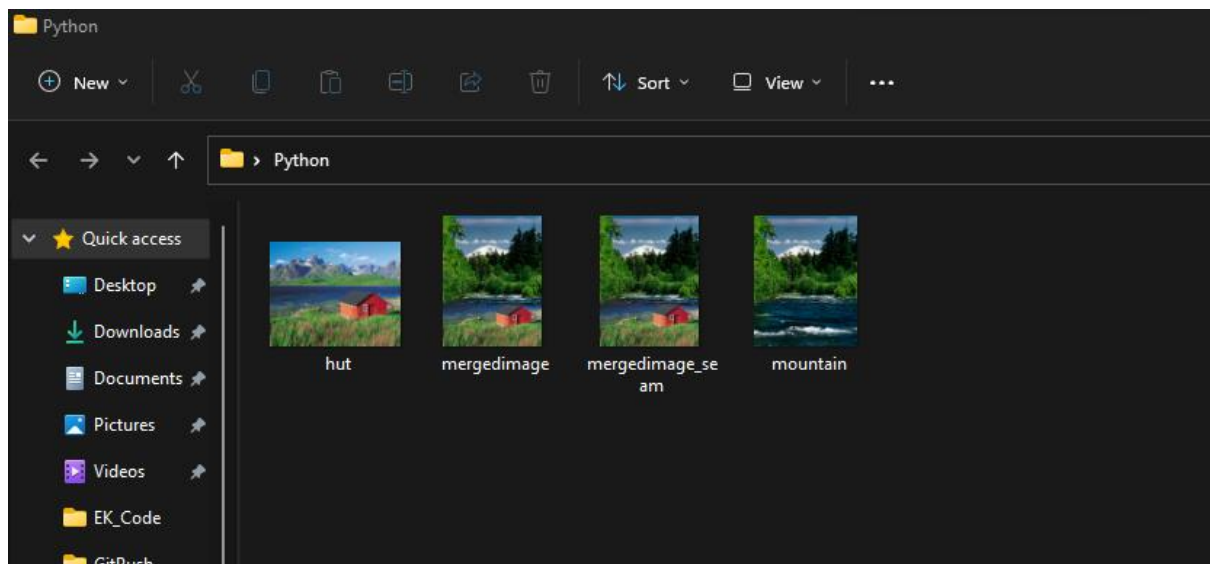

2. Run the code. It will prompt you to give the input folder value

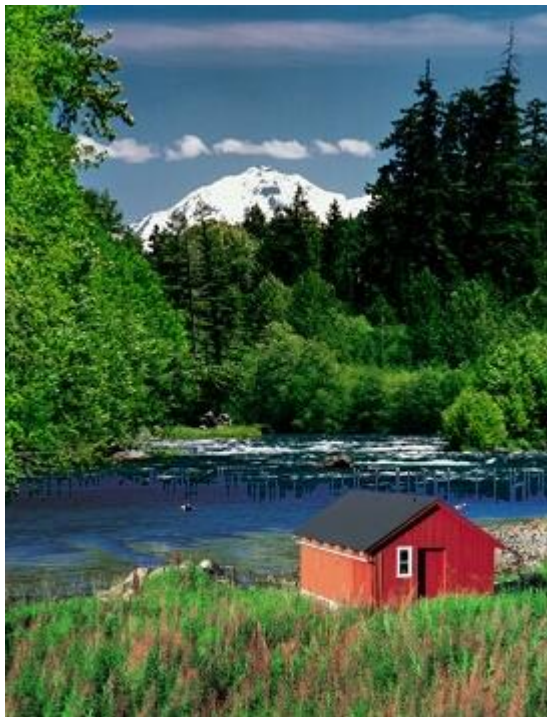

3. Find the final output in the same path where we have the input images which is also shown in the terminal

```
Find the output image with seam here: C:\Users\vishn\Desktop\Python\mergedimage_seam.jpg
Find the output image here: C:\Users\vishn\Desktop\Python\mergedimage.jpg
PS C:\Users\vishn\Documents\UMBC Notes\DAA\Proj1\EK_Code> [
```

Final output image

Final output image with seam in red
